

Hydra-Test

the ultimate in transmission testing equipment

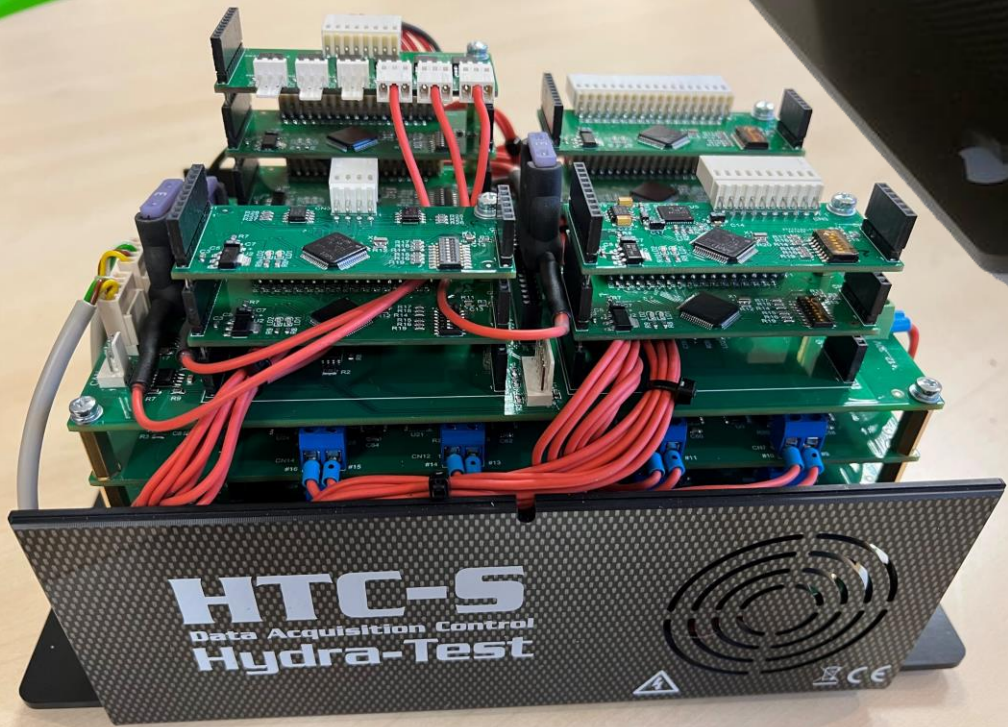

HT-MULTI-SOL

Solenoid & Accumulator test machine

Automated testing with clamping system
and detailed Pass/Fail Software

16 x **Solenoids** tested simultaneously
or

4 x **Stop/Start Accumulators** tested simultaneously

Bespoke developed HTC-S Controller to enable accurate control of the following:

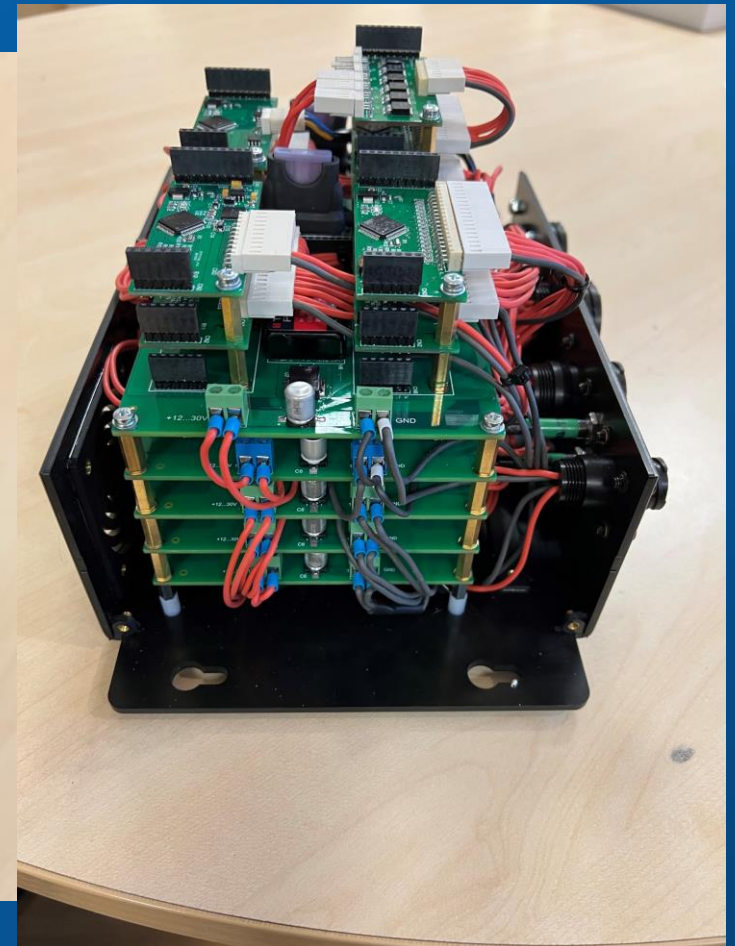

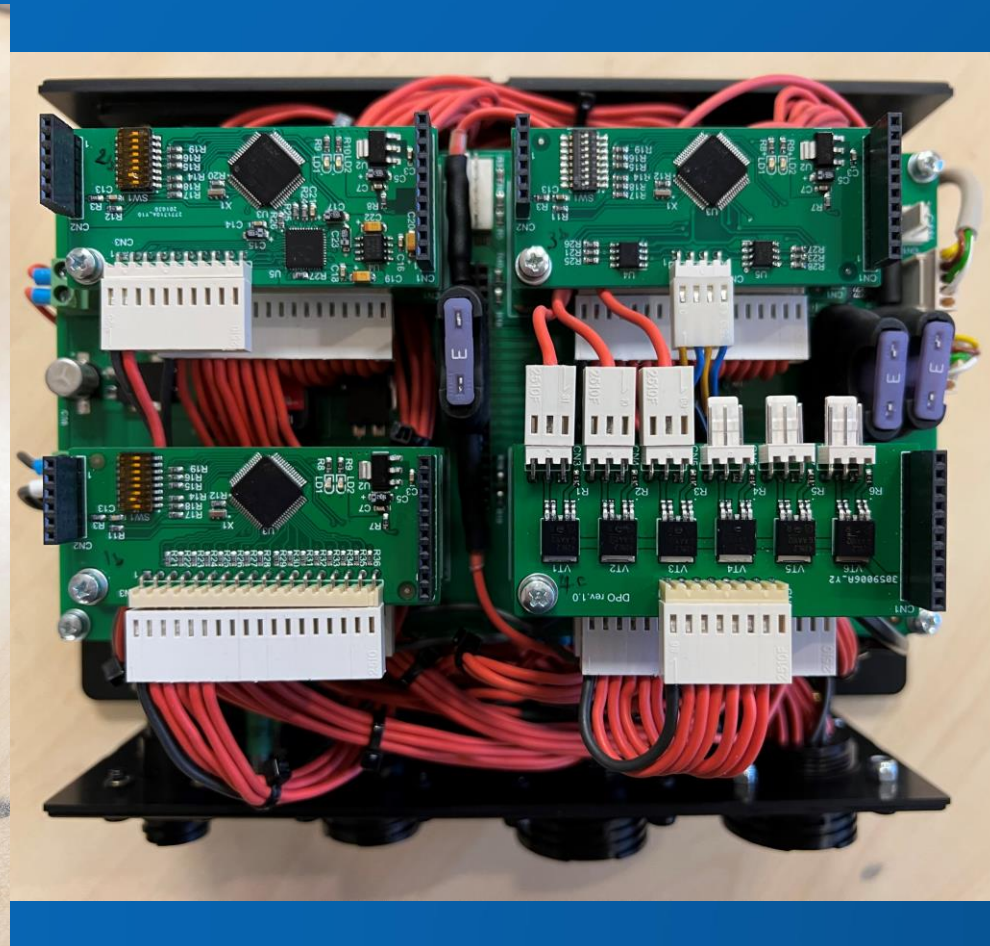

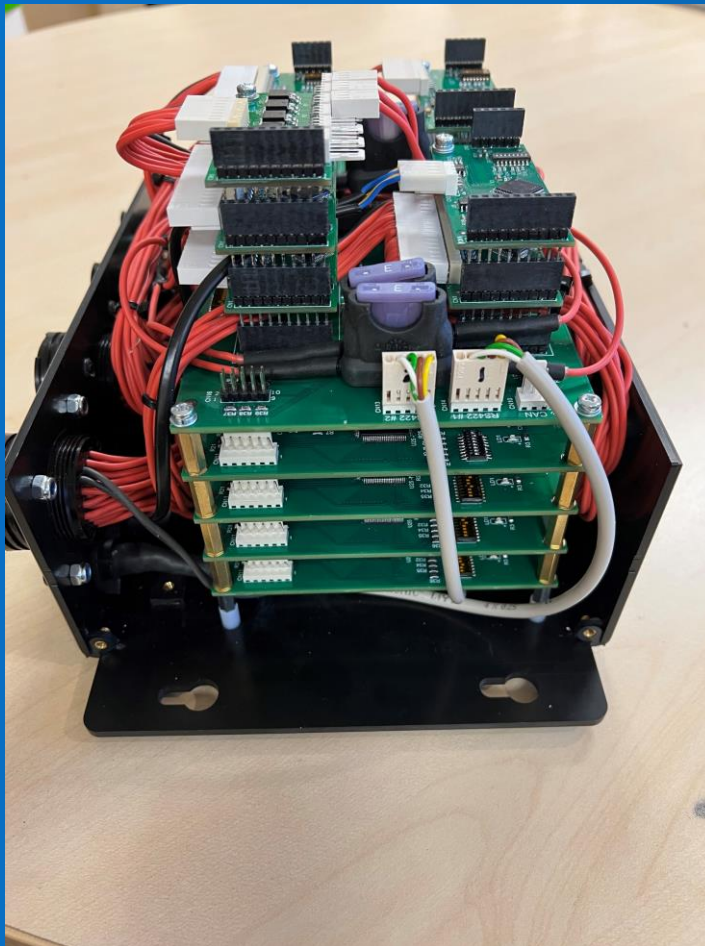

16 PMW or DC Solenoid control

16 Channel Data capture capability

A total of precision 51 Flow Control valves to divert fluid – Input/Flush/Gauge

Input and Output Flow Meters

Dual Thermocouple for stable temperature control

The HT-Multi Sol machine was designed on our original VBT chassis. Whilst keeping many of the tried and tested features, a whole lot more was added to accomplish this ground breaking 'End of Line' OEM specification 16 Port solenoid test machine.
